Early nineteenth-century American prisons followed one of two dominant models: the Auburn system, in which prisoners performed factory-style labor by day and were placed in solitary confinement at night, and the Pennsylvania system, where prisoners faced 24-hour solitary confinement for the duration of their sentences. By the close of the Civil War, the majority of prisons in the United States had adopted the Auburn system - the only exception was Philadelphia's Eastern State Penitentiary, making it the subject of much criticism and a fascinating outlier. Using the Eastern State Penitentiary as a case study, *The Deviant Prison* brings to

light anxieties and other challenges of nineteenth-century prison administration that helped embed our prison system as we know it today. Drawing on organizational theory and providing a rich account of prison life, the institution, and key actors, Ashley T. Rubin examines why Eastern's administrators clung to what was increasingly viewed as an outdated and inhuman model of prison - and what their commitment tells us about penal reform in an era when prisons were still new and carefully scrutinized.

The epic, behind-the-scenes story of an astounding gap in our scientific knowledge of the cosmos. In the past few years, a handful of scientists have been in a race to explain a disturbing aspect of our universe: only 4 percent of it consists of the matter that makes up you, me, our books, and every planet, star, and galaxy. The rest—96 percent of the universe—is completely unknown. Richard Panek tells the dramatic story of how scientists reached this conclusion, and what they're doing to find this "dark" matter and an even more bizarre substance called dark energy. Based on in-depth, on-site reporting and hundreds of interviews—with everyone from Berkeley's feisty Saul Perlmutter and Johns Hopkins's meticulous Adam Riess to the quietly revolutionary Vera Rubin—the book offers an intimate portrait of the bitter rivalries and fruitful collaborations, the eureka moments and blind alleys, that have fueled their search, redefined science, and reinvented the universe.

New technologies, developments in implant design and advances in surgical technique have improved outcomes after joint replacement and decreased rate of complications. It is not a surprise that the number of arthroplasties increases steadily every year and nowadays more than one million patients undergo the procedure annually worldwide. This book is a sequel of a successful series dedicated to one of the fastest growing fields in orthopedics - arthroplasty. Aiming at dissemination of scientific research this book provides a profound overview of the recent evolution of technology and surgical techniques. New developments of implant design and current treatment strategies have been critically discussed by the contributing authors. The process of improving care for patients and standards of treatment requires straightforward access to up-to-date research and knowledge. The format of the publication allows easy and quick reference to shared ideas and concepts. We hope, that the current book will add significant contribution to the success of this endeavor.

The most powerful autobiographical novel written about the Yugoslav wars. A timely and deeply accessible book that speaks to what it is like to be displaced by war. *Hotel Tito* is an award-winning autobiographical novel of the Serbo-Croatian War. Author Ivana Bodrožić was born in the Croatian town of Vukovar, just across the Danube from Serbia. In the fall of 1991, Vukovar was besieged by the Yugoslav People's Army for eighty-seven days.

When the army broke the siege, people came up out of the basements where they'd been sheltering from bombardment; women and children were allowed out of the besieged city, but the army bused 400 men from the hospital to a farm on the outskirts where soldiers and Serbian paramilitaries massacred them. Bodrožić's father was among those taken and murdered. In *Hotel Tito*, after fleeing the war zone their town has become, the mother and two children are housed along with other displaced persons at a former communist school in the village of Kumrovec (the birthplace of Josip Tito). For years they share a single room just large enough for their three beds,

Named a Best Book of the Year by the Los Angeles Public Library This hilarious, colorful portrait of a sex worker navigating life in modern Morocco introduces a promising new literary voice. Thirty-four-year-old prostitute Jmiaa reflects on the bustling world around her with a brutal honesty, but also a quick wit that cuts through the drudgery. Like many of the women in her working-class Casablanca neighborhood, Jmiaa struggles to earn enough money to support herself and her family—often including the deadbeat husband who walked out on her and their young daughter. While she doesn't despair about her profession like her roommate, Halima, who reads the Quran between clients, she still has to maintain a delicate balance between her reality and the "respectable" one she paints for her own more conservative mother. This daily grind is interrupted by the arrival of an aspiring young director, Chadlia, whom Jmiaa takes to calling "Horse Mouth." Chadlia enlists Jmiaa's help on a film project, initially just to make sure the plot and dialogue are authentic. But when she's unable to find an actress who's right for the starring role, she turns again to Jmiaa, giving the latter an incredible opportunity for a better life. In her breakout debut novel, Meryem Alaoui creates a vibrant picture of the day-to-day challenges faced by working people in Casablanca, which they meet head-on with resourcefulness and resilience.

times. In this breathtaking short story collection, she turns the concept of truth over in her hands like a beautifully crafted pair of gloves. From the triumph of the Orange Revolution, which marked the start of the twenty-first century, to domestic victories in matchmaking, sibling rivalry, and even tennis, Zabuzhko manages to shock the reader by juxtaposing things as they are--inarguable, visible to the naked eye--with how things could be, weaving myth and fairy tale into pivotal moments just as we weave a satisfying narrative arc into our own personal mythologies. At once intimate and worldly, these stories resonate with Zabuzhko's irreverent and prescient voice, echoing long after reading.

They're exhilarating to read, just as exhilarating to re-read."—Deborah Eisenberg Childhood does not last long in the Argentine mountains of Córdoba, and adult lives fall apart quickly. In disarming, darkly humorous stories, Federico Falco explores themes of obsessive love, romantic attachment and the strategies we must find to cope with death and painful longing. In the middle of a blizzard a widow watches the ruin of her late-husband's garden, until suddenly she sees a woman running naked in the falling snow. After telling her parents she is abandoning her Christian faith, a girl becomes infatuated with a Mormon missionary who reminds her of a boy killed in her village years before. When his family's home is lost, a father desperately offers his daughter's hand in marriage to anyone who will take them in. And a town's mayor tries to fulfill his father's dying wish – to design the perfect cemetery.

In the tradition of *Shattered* and *Game Change*, Washington Post columnist Jennifer Rubin provides an insider's look at how women across the political spectrum carried a revolution to the ballot box and defeated Donald Trump, based on interviews with key figures such as Kamala Harris, Amy Klobuchar, Stacey Abrams, Nancy Pelosi, and many more. In a compelling narrative, bookended by Donald Trump's 2016 victory and his 2020 defeat, Rubin delivers an absorbing analysis of the women's counter-Trump revolution. *Resistance* tracks a set of dynamic women voters, activists and politicians who rose up when Donald Trump took the White House and fundamentally changed the political landscape. From the first Women's March the day after Trump's inauguration to the Blue Wave in the 2018 midterms to the flood of female presidential candidates in 2020 to the inauguration of Kamala Harris, women from across the ideological spectrum entered the political arena and became energized in a way America had not witnessed in decades. They marched, they

organized, they donated vast sums of cash, they ran for office, they made new alliances. And they defeated Donald Trump. Democratic women candidates learned that they could win in large numbers, even in red districts. Black women voters in 2020 surged in Georgia and in suburbs in key swing states. Women across the country voted in greater numbers than in any previous election, flipped the Senate, and ensured victory for the first female Vice President in the nation's history. While Democrats recorded impressive victories, Republican women delivered critical victories of their own. From the White House to Congress, from activists to protestors, from liberals to conservatives, Resistance delivers the first comprehensive portrait of women's historic political surge provoked by the horror of President Trump. This is the indelible story of how American women transformed their own lives, vanquished Trump, secured unprecedented positions of power and redefined US politics decades to come. Resistance is essential reading for understanding the most important election in American history and the role women played in redesigning modern politics.

Vasari's Lives of the Painters, Sculptors, and Architects are and always have been central texts for the study of the Italian Renaissance. They can and should be read in many ways. Since their publication in the mid-sixteenth century, they have been a source of both information and pleasure. Their immediacy after more than four hundred years is a measure of Vasari's success. He wished the artists of his day, himself included, to be famous. He made the association of artistry and genius, of renaissance and the arts so familiar that they now seem inevitable. In this book Patricia Rubin argues that both the inevitability and the immediacy should be questioned. To read Vasari without historical perspective results in a limited and distorted view of The Lives. Rubin shows that Vasari had distinct ideas about the nature of his task as a biographer, about the importance of interpretation, judgment, and example - about the historian's art. Vasari's principles and practices as a writer are examined here, as are their sources in Vasari's experiences as an artist.

At The Lucky Hand is an account of the different love stories that revolve around a very peculiar book: My Legacy, by Anastas Branica. At first glance, this is a book where there is no plot or characters, only descriptions. However, that is what makes it a self-sufficient space, a world that can only be inhabited by its readers, which Anastas has written in order to live, within the book, with his beloved. Through what Petrovic called “simultaneous reading”, it is possible to coincide with other people in the same book, and not only that, but also to live beyond what is simply written. Within this experience of reading-while-reading, participants are able to access a meeting place that is outside of reality. How else can we describe what happens to us when we read with true conviction, when books become life, palpable, manifested, when books become part of our physiology, when love is incarnated in the reading that two strangers perform at the same time, hoping that time will be abolished by the mere fact of fixing their gaze on a page? In short, what the reader of this book will surely experience, along with all the other readers who coincide in the experience, will be a state of joyous stupefaction. Above all else, the book is a love letter to the power of

away the feeling of perfection. Author Jane Loeb Rubin is all too familiar with this feeling. In *Almost a Princess*, she presents a collection of essays that document her twice-fought battle with cancer. In this memoir, Rubin, a hospital administrator and two-time cancer survivor, shares her experiences from the dual perspectives of a patient and a health care professional. She reflects on her life growing up in a secular Jewish home with a hard-nosed but loving father, marrying her high school sweetheart at nineteen, raising three children as a divorced single parent, working in the health care field, remarrying in her forties, and becoming a grandmother—all with the wise insights gained from struggling with her own health challenges. *Almost a Princess* discusses the coping strategies Rubin developed for herself, provides insight for other cancer patients and their families, and reflects on what it means to be a survivor. She communicates the importance of embracing what we are given each day, doing the best we can with it, and feeling the joy and fulfillment that comes with our past, present, and ongoing life stories.

This is the first textbook on pattern recognition to present the Bayesian viewpoint. The book presents approximate inference algorithms that permit fast approximate answers in situations where exact answers are not feasible. It uses graphical models to describe probability distributions when no other books apply graphical models to machine learning. No previous knowledge of pattern recognition or machine learning concepts is assumed. Familiarity with multivariate calculus and basic linear algebra is required, and some experience in the use of probabilities would be helpful though not essential as the book includes a self-contained introduction to basic probability theory.

for identity and meaning in Istanbul after the loss of his memory. A blues singer, Boratin, attempts suicide by jumping off the Bosphorus Bridge, but opens his eyes in the hospital. He has lost his memory, and can't recall why he wished to end his life. He remembers only things that are unrelated to himself, but confuses their timing. He knows that the Ottoman Empire fell, and that the last sultan died, but has no idea when. His mind falters when remembering civilizations, while life, like a labyrinth, leads him down different paths. From the confusion of his social and individual memory, he is faced with two questions. Does physical recognition provide a sense of identity? Which is more liberating for a man, or a society: knowing the past, or forgetting it?
