Duiker's comprehensive, balanced history of the world in the twentieth and twenty-first centuries provides you with context for interpreting the events that you hear about in the news each day. You'll view history from the broader global perspective, while at the same time gaining insight into the distinct character of individual civilizations and regions. To ensure that you'll have a well-rounded understanding of the most decisive moments in recent times, Duiker integrates political, economic, social, and cultural history into a smoothly written narrative. The Fifth Edition text includes a special insert that guides you in using the text's many detailed maps and helps you learn how to make important connections between geography and the turn of historic events. Additional tools include timelines that highlight and contrast different cultures and nations--giving you an "at-a-glance," holistic perspective on eras and their defining events; photos from William Duiker's own collection for a closer, more personal look at the world we live in; and primary-source documents that illustrate and clarify key points. In this Second Edition of this radical social history of America from Columbus to the present, Howard Zinn includes substantial coverage of the Carter, Reagan and Bush years and an Afterword on the Clinton presidency. Its commitment and vigorous style mean it will be compelling reading for under-graduate and post-graduate students and scholars in American social history and American studies, as well as the general

reader.

In this new edition of his widely acclaimed study, William Duiker has revised and updated his analysis of the Communist movement in Vietnam from its formation in 1930 to the dilemmas facing its leadership in the post-Cold War era. Making use of newly available documentary sources and recent Western scholarship, the author reevaluates Communist revolutionary strategy during the Vietnam War. Based on primary materials in several languages, this respected work is essential for an understanding of Vietnam in the twentieth century.

Both a political history and a moral critique of the twentieth century, this is a personal and impassioned book from one of Europe's most outstanding intellectuals. Identifying totalitarianism as the major innovation of the twentieth century, Tzvetan Todorov examines the struggle between this system and democracy and its effects on human life and consciousness. Totalitarianism managed to impose itself because, more than any other political system, it played on people's need for the absolute: it fed their hope to endow life with meaning by taking part in the construction of a paradise on earth. As a result, millions of people lost their lives in the name of a higher good. While democracy eventually won the struggle against totalitarianism in much of the world, democracy itself is not immune to the pitfall of do-goodery: moral correctness at home and atomic or "humanitarian" bombs abroad. Todorov explores the history of the past century not only by analyzing its spectacular political conflicts but also by offering

moving profiles of several individuals who, at great personal cost, resisted the strictures of the communist and Nazi regimes. Some--Margarete Buber-Neumann, David Rousset, Primo Levi, and Germaine Tillion--were deported to concentration camps. Others--Vasily Grossman and Romain Gary--fought courageously in World War II. All became exemplary witnesses who described with great lucidity and humanity what they had endured. This book preserves the memory of the past as we move into the twenty-first century--arguing eloquently that we must place the past at the service of a just future.

From the end of World War II down to the dissolution of the Soviet Union, the primary objective of U.S. foreign policy has been to prevent the expansion of communism. Indeed, that objective was directly embodied in the so-called strategy of containment, a global approach to the pursuit of U.S. national security interests that was first adumbrated by George F. Kennan in 1947 and later became the guiding force in U.S. foreign policy. At first, the concept of containment was applied primarily to Europe. It was there that the threat to U.S. interests from international communism directed from Moscow was first perceived, in the form of Soviet efforts to dominate the nations of Eastern Europe and extend Soviet influence into the eastern Mediterranean and the Middle East. Other areas of the world—Asia, Africa, and Latin America—were considered to be less threatened by forces hostile to the free world or more peripheral to U.S. foreign policy concerns. At least that was the view initially proclaimed by George

Kennan himself, who identified five areas in the world as vital to the United States: North America, Great Britain, Central Europe, the USSR, and Japan. Only the latter was located in Asia. By the end of the decade, however, the focus of U.S. containment strategy was extended to include East and Southeast Asia, primarily because of the increasing likelihood of a communist victory in the Chinese Civil War, which, in the minds of some U.S. policymakers, would be tantamount to giving the Soviet Union a dominant position on the Asian mainland. Added to the growing threat in China was the increasingly unstable situation in Southeast Asia, where the long arc of colonies that had been established by the imperialist powers during the last half of the nineteenth century was gradually but inexorably being replaced by independent states. The emergence of such colonial territories into independence was generally viewed as a welcome prospect by foreign policy observers in Washington, but when combined with the impending victory of communist forces in China it raised the unsettling possibility that the entire region might be brought within the reach of the Kremlin.

Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.
